Company profile

We build AI for care.

Axiomatic B.V., based in Delft, builds Inora, the AI care assistant for care organisations. Inora answers from a care organisation's own protocols and work agreements, readies the next steps and writes the report in the organisation's own format; both go only on the care worker's approval, and the professional decides. More than 30 care organisations work with Inora, in paid use since September 2025, with thousands of care workers. Inora won the AI4PI Award 2026.

95%
of answers to care questions rated good
As of 24 August 2026

45%
questions and tasks came in the evening, at night or at the weekend
As of 7 October 2026

20
times as many questions a month in South Limburg, in twelve months
As of 30 September 2026

72%
of care workers came back five times or more
As of 24 August 2026
